Cleveland, Ohio – March 2011

GVI Medical Devices, Inc. (gviMD) is proud to announce that it has received the prestigious Frost & Sullivan, 2011 North American Mobile Cardiac SPECT Technology Innovation of the Year Award.

The award is given annually to recognize best-in-class companies worldwide based on uniqueness of technology, impact on new products/applications, impact on functionality, impact on customer value, and relevance of innovation to industry. Benchmarked against key competitors, Northeast Ohio's GVI Medical Devices received the highest weighted rating for its accomplishments in the mobile cardiac SPECT market with mSPECT™, its mobile nuclear cardiology imaging system. Frost & Sullivan called mSPECT™ "truly unique" for its portability and dedicated use for nuclear cardiology procedures.

Randy Sommerdyke, President of GVI Medical Devices, stated, "Winning a coveted Frost & Sullivan award is a major accomplishment for our Company and provides well deserved recognition for the dedicated efforts of our employees." "This is an important and timely milestone providing external credibility and recognition during our market introduction of the mSPECT™ mobile nuclear cardiology imaging system."

GVI Medical Devices is a diagnostic imaging equipment company located in Twinsburg, Ohio. The company specializes in the development and manufacturing of advanced, dedicated nuclear cardiology SPECT imaging systems for the outpatient market. Nuclear cardiology imaging is a primary, non invasive method used to diagnose coronary artery disease, the leading cause of adult deaths in the United States.

Frost & Sullivan is a prestigious global research organization entering its 50th year in business with 1800 analysts and consultants who monitor more than 300 industries and 250,000 companies. According to Frost & Sullivan "The selection of this Award is derived from in-depth interviews and primary market analysis conducted by our industry analyst team." "Based on the findings of this Best Practices research, Frost & Sullivan is proud to present the 2011 North American Technology Innovation of the Year Award in the Mobile Cardiac SPECT market to GVI Medical Devices."
